- Application Timing Recommendations:

*1-4x per season*

- *Early season growth*
- *After each cutting*

*Livestock/Feed Info*

*Growers Report*

"After one application on alfalfa, protein, digestibility, and feed values spiked significantly. My new seeding alfalfa had a much greater drought resilience. Quality and yield seemed to increase on every pass and results were visually noted in my first walk into a lush green field of alfalfa 10 days after applying EnSoil Algae™."

**IMPROVE SOIL HEALTH**

**BOOST NUTRIENT DENSITY**

**ENHANCE STRESS ADAPTATION**

**INCREASE RETURN ON INVESTMENT**

"We did not use any fertilizer in the field that got the EnSoil. The alfalfa with algae was taller, leafier, healthier. There was no black stem. It is a very impressive product. We will use it on all of our acres next year."
