- Post-emergence (30-45 days after planting)
- During tuber bulking (50-90 days after planting)

IMPROVE SOIL HEALTH

BOOST YIELD

ENHANCE STRESS ADAPTATION

INCREASE RETURN ON INVESTMENT

"EnSoil Algae™ has been an enhancer for our farm. It has enhanced our soil biology, foliar spray uptakes, optimized plant nutrient uptake, energy value, stress adaptation, plant health, and we have seen consistent yield increases versus the check strips. The ROI is there to use EnSoil Algae™ across all of our acres."

-- JRH Grain Farms, NC

As a side note, it was an awesome feeling to be able to stand next to our sprayer and take a video without smelling chemicals in the air or having my eyes burn.

-- Suwannee Ranch 505, FL

"We liked what we saw with EnSoil Algae™. We think it can help us cut back on fertilizer."

--Kornegay Farms, NC
