

EnSoil Algae™ on Turf

- Application rate: 8oz./acre
- Tank Mix Compatible

Compatible with standard turf management inputs including, but not limited to, herbicides, NPK fertilizers, fungicides, biologicals, wetting agents, etc.

- Compatible with all irrigation systems and application equipment

Including but not limited to drip, sprinkler, pivot, boom sprayer, drone, backpack sprayer, watering can, etc.

- Application Recommendations:

For optimal establishment of soil health benefits, apply weekly for two weeks.

For ongoing soil health maintenance, apply every 4 to 8 weeks. This can be integrated with your regular fertilization schedule.

"In SC at Cougar Point Driving Range, where synthetic fertilizers were not used, EnSoil Algae™ application increased the Soil Health Score by nearly 200% in just three months."

Why Soil Health Score Matters: A higher score reflects a thriving soil environment, resulting in more resilient turf and reduced input needs, saving you time and resources while improving overall turf color and quality.

IMPROVE WATER USE EFFICIENCY

STRENGTHEN GREEN COLOR

ENHANCE STRESS RESILIENCE

INCREASE RETURN ON INVESTMENT

"Trials in SC at The River Course showed that adding EnSoil Algae™ to the standard NPK program more than doubled the Soil Health Score compared to NPK alone after four months."
