- Application Timing Recommendations:

1-4x per season

- *Early season growth*
- *After each cutting*

Livestock/Feed Info

Growers Report

"After one application on alfalfa, protein, digestibility, and feed values spiked significantly. My new seeding alfalfa had a much greater drought resilience. Quality and yield seemed to increase on every pass and results were visually noted in my first walk into a lush green field of alfalfa 10 days after applying EnSoil Algae™."

-- Janski Farms | MN

IMPROVE SOIL HEALTH

BOOST NUTRIENT DENSITY

ENHANCE STRESS ADAPTATION

INCREASE RETURN ON INVESTMENT

"We did not use any fertilizer in the field that got the EnSoil. The alfalfa with algae was taller, leafier, healthier. There was no black stem. It is a very impressive product. We will use it on all of our acres next year."
