

EnSoil Algae™ on Strawberries

- Application rate: 8oz./acre
- Compatible with all irrigation systems and application equipment

Including but not limited to drip, micro injection, sprinkler, pivot, furrow, boom sprayer, drone, Y-drop, knife, backpack sprayer, watering can, etc.

- Tank Mix Compatible

Compatible with standard grower inputs including but not limited to herbicide, NPK, primer, fungicide, biologicals, etc. Consult with a team member before mixing with copper or zinc.

- Application Timing Recommendations:

Every two weeks. Alternate between soil and foliar applications.

"EnSoil Algae™ is making the plants more efficient at feeding the microbes, harvesting them, and sucking the nutrients out. You're getting more function from the microbes."

-- Liz Haney

"We have been using this since december planting, early season harvest is promising. I am looking forward to the rest of the season."

-- Anonymous | CA

IMPROVE SOIL HEALTH

BOOST YIELD

ENHANCE STRESS ADAPTATION

INCREASE RETURN ON INVESTMENT

"We've had very exciting production on strawberries when incorporating EnSoil Algae™ into our fertility program. The plants we've grown using EnSoil are some of the prettiest we have ever grown."
