Irrigation:

- 1st: pre bud / at bud break
- 2nd: mid-season / pre-stress
- 3rd: fruit set / fruit fill

Foliar:

- 2x with fungicide application

"We saw significant visual evidence in improved root mass and plant height plus the increase in copper uptake from the plant tissue analysis. Before harvest in the field, we saw less evidence of disease and more fruiting and flowers on plants [onions, potatoes, peppers, cucumbers, apples, cabbage, broccoli, tomatoes, melons and more] treated with EnSoil Algae™."

-- The Plant Company | GA

IMPROVE SOIL HEALTH & DIVERSITY

BOOST NUTRIENT CYCLING

ENHANCE STRESS ADAPTATION

INCREASE RETURN ON INVESTMENT

"EnSoil Algae™ is making the plants more efficient at feeding the microbes, harvesting them, and sucking the nutrients out. You're getting more function from the microbes."
